

RPET Recycle

The fabric used in the manufacturing process of these items is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos está fabricado con plástico reciclado (rpét), que además ayuda en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho más sano para el medio ambiente.

THE JUNCO

QUANZHOU JUNKE SPORTING GOODS CO.,LTD

RPET

The RPET fabric is made of recycled and environmentally friendly fiber materials recycled from Coke bottles. The recycled Coke bottles are rolled into pieces and processed by wire drawing, it can be recycled and can effectively reduce carbon dioxide emissions.

The production of RPET fabric can save oil resources to a certain extent and make a great contribution to the protection of ecological environment.

Rpet ECO

RPET fabric is a new type of green recycled fabric, is made of recycled "Coke bottle" recycled fiber textiles, 100% of its recycled material can be recycled into PET fiber, so it effectively reduces the waste generation.

By choosing products made from RPET, you create a circular economy and reduce the production of new PET by continuing to use valuable resources that are already mined.

A person with a backpack is standing on a rocky peak, looking out over a vast, dense forest. The scene is captured in a light, blue-tinted style, giving it a serene and adventurous feel. The person is positioned in the lower center of the frame, with their back to the camera. The forest below is a mix of evergreen and deciduous trees, stretching towards the horizon. The overall composition is centered and balanced, emphasizing the natural beauty and solitude of the location.
